

**Amendments to the Claims:**

The following Listing of Claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

55. (Currently Amended) A package assembly for placement on a surface and for storing and/or delivering substances such as dental substances, comprising:

- a) at least one container comprising a base and a lid; and
- b) at least one hinge connecting the base and the lid;

wherein the base and the lid comprise first and second levers, the first and second levers are provided at the container essentially on the side of the hinge with their free ends extending in essentially [in a] the same direction away from the hinge when the container is either opened or closed;

and wherein the container can be opened or the lid can be removed from the base by moving the free ends of the first and second levers towards each other.

56. (Previously Presented) The package assembly according to claim 55, wherein the hinge is provided between the first and second lever.

57. (Previously Presented) The package assembly according to claim 55, wherein the container comprises a first end next to the base and a second end next to the lid, which is adapted for air-tight closing of the container at the second end.

58. (Previously Presented) The package assembly according to claim 55, wherein the end of the second lever is bent in a direction away from the first lever.

59. (Previously Presented) The package assembly according to claim 55, wherein the container is pre-filled with at least one dental substance.

60. (Previously Presented) The package assembly according to claim 55, wherein the base, the lid and the hinge are integrally molded.

61. (Previously Presented) The package assembly according to claim 55, wherein the base and/or the lid are manufactured with an opening for filling the container after manufacturing and for sealing with a seal.

62. (Previously Presented) The package assembly according to claim 61, wherein the container is sealed with a seal at the first end.

63. (Previously Presented) The package assembly according to claim 62, wherein the seal is a foil and/or a plug and/or part of the base.

64. (Previously Presented) The package assembly according to claim 62, wherein the seal is a foil and/or a plug and/or part of the lid.

65. (Withdrawn) The package assembly according to claim 55, wherein the container comprises in the initial state at least one dental substance and the container is closed at the first end by the lid, wherein the boundary between the lid and the second end is sealed with a breakable seal.
66. (Withdrawn) The package assembly according to claim 65, wherein the back comprises a non-skid and/or sticky layer for standing the package assembly on a surface.
67. (Withdrawn) The package assembly according to claim 65, wherein the assembly further includes a ring member, to enable a user to wear the package assembly like a ring on at least one finger.
68. (Withdrawn) The package assembly according to claim 65, wherein at least the back is made of soft elastic material.
69. (Withdrawn) The package assembly according to claim 55, wherein the first and/or second levers comprise(s) a fixation mechanism for attaching the second lever to the first lever and to ensure that the lid stays open after having been opened.
70. (Withdrawn) The package assembly according to claim 69, wherein the fixation mechanism comprises a recess and a clip device for preferably releasably engaging the clip with the recess.
71. (Withdrawn) The package assembly according to claim 69, wherein the fixation mechanism comprises a fork at one lever and a snapper at the other second lever for preferably releasably engaging said snapper with the fork.
72. (Withdrawn) The package assembly according to claim 69, wherein the fixation mechanism comprises sticky glue or pressure sensitive adhesive for attaching the first and second levers together.
73. (Previously Presented) The package assembly according to claim 55, wherein the package comprises a disposable applicator.
74. (Withdrawn) The package assembly according claim 55, wherein the container comprises at least two containers.
75. (Withdrawn) The package assembly according to claim 74, wherein the at least two containers are provided separately with independent openings.
76. (Withdrawn) The package assembly according to claim 74, wherein the at least two containers comprise one common lid.

77. (Withdrawn) The package assembly according to claim 76, wherein the common lid is T-shaped, in case the two containers are arranged side by side, and allows sequential activation of the containers.

78. (Withdrawn) The package assembly according to claim 55, further comprising an area adapted for swabbing a brush or a mixing cavity for mixing components with a brush.

79. (Withdrawn) The package assembly according to claim 78, wherein the mixing cavity is part of the container and is re-closable by the lid.

80. (Withdrawn) The package assembly according to claim 55, wherein the lid comprises a second container adapted for storing a substance.

81. (Withdrawn) The package assembly according to claim 79, wherein the second container and/or the lid comprises a bore adapted for connecting the capacity of the container with the capacity of the second container of the lid for dispensing the substance into the container.

82. (Withdrawn) The package assembly according to claim 80, wherein the bore is sealed by a base foil of a sachet.

83. (Withdrawn) The package assembly according to claim 81, wherein upon activation the base foil of the sachet will rupture at the bore for dispensing the additional substance into the container.

84. (Currently Amended) The package assembly according to claim 55, wherein the package assembly exhibits an orange color, to filter blue light while providing a [for] transparent appearance [of the package an orange coloring to filter blue light is used].

85. (Withdrawn) The package assembly according to claim 55, wherein the container is sealed with a foil.

86. (Previously Presented) The package assembly according to claim 55, wherein the lid and/or container comprise a self-cleaning or low energy surface, preferably all surfaces which are supposed to get in contact with the components.

87. (Previously Presented) Method for providing dental substances, comprising the steps of:

- a) providing a package assembly according to any of the previous claims,
  - b) opening the initial closed package assembly by pressing the two levers together,
- and
- c) taking the substance out of the container.

88. (Withdrawn) Method for providing dental substances according to claim 87, comprising before step b) the further step:

a1) pressing the lid in the direction of the container for breaking the seal.

89. (Previously Presented) Method for providing dental substances according to claim 87, comprising after step c) the further the step:

d) closing the container by pressing the lid onto the container.

90. (Currently Amended) The assembly according to claim 55, further comprising at least one of the [following] materials selected from the group consisting of: dental primers; bondings; etching gel/liquids; filling materials, such as composites, resin modified glass ionomer cements; temporary filling material; varnishes; glue, such as cyanoacrylate; pharmaceuticals, such as liquids, gels, pastes; varnishes; nail polish; touch up paints; cosmetics, such as lip gloss; a substance for the treatment or prevention or identification of caries; a substance for the prevention or identification or removal of plaque; a substance for root canal treatment; a substance for the removal of carious or decayed or infected dentine or enamel and/or a substance for the removal of denaturated dentine.
